DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 6-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Berkane et al.

The cited prior art discloses a process for the enzyme-catalyzed synthesis of cyclic oligomeric polyesters comprising the reaction of diesters and diols in a solvent at different temperatures, and in the presence of enzymes such as claimed. See pages 7729-7731 for a disclosure of the type of diesters and diols. An example of the solvent is toluene.

2. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Lavalette et al and Mezoul et al.

Both of the cited prior arts disclose process for the preparation of enzyme-catalyzed synthesis of cyclic ester oligomers in the presence of an enzyme from linear ester oligomers in dissolved in a solvent as claimed. See pages 225-227 of Lavalette and pages 541-544 of Mezoul. The prior art disclosures have features and characteristics as claimed.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re*

Art Unit: 1711

Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-11 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-13 of copending Application No. 10/426,600. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed process herein of preparing cyclic ester oligomers by contacting a linear ester oligomer dissolved in a solvent with an enzyme to generate a solution followed by the separation of the oligomer from solution, is obviously the same and patentably indistinguishable from the process in the '600 which is a process for the production of a cyclic ester oligomer derived from an aromatic acid and a diol in a solvent, and in the presence of a second component which is an enzyme as claimed, and at selected temperatures.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

5. References listed on PTO-1449 have been made part of the record.
